

Comprehensive Heart Disease Risk Assessment Report

Patient: Nagulla Nagamani	Age / Gender: 63 yrs / Female	Date: 28 June 2026, 08:08 PM
Referred By: KIRAN KUMAR SIRIPURAPU	Report ID: CA-202606282008	System: CardioAI v2.0

RISK ASSESSMENT RESULT

■

LOW RISK

59.0%

Estimated Cardiac Risk Probability

Risk Score: 59.0% — Monitor regularly and improve lifestyle.

CLINICAL PARAMETERS

Parameter	Value	Reference Range	Status
Blood Pressure	120 mmHg	90–120 mmHg	■ Normal
Cholesterol	253 mg/dL	< 200 mg/dL	■■ High
Max Heart Rate	150 bpm	60–100 bpm (rest)	■ Active
ST Depression	0.0	0.0–1.0	■ Normal
Fasting Blood Sugar	High	< 120 mg/dL	■■ High
Exercise Angina	No	No (ideal)	■ Absent
Major Vessels	3	0 (ideal)	■■ 3 vessel(s)

PERSONALISED DIET PLAN

■ FOODS TO EAT DAILY	
■	Colorful salads with olive oil dressing
■	Fresh seasonal fruits — 2–3 servings daily
■	Whole grains — brown rice, multigrain roti
■	Egg whites — lean protein without saturated fat
■	Legumes — rajma, chickpeas, lentils
■	Low-fat dairy — curd, buttermilk
■ FOODS TO AVOID	
■	Fast food & junk food — hidden trans fats
■	Sweets & desserts — spike blood sugar
■	Processed meats — sausages, bacon

■	Excess butter & ghee
■	Alcohol — raises triglycerides
■	Excess caffeine — more than 2 cups/day

SUGGESTED DAILY MEAL PLAN

Meal Time	Suggested Food
Breakfast	Vegetable upma / poha + 1 banana + low-fat milk
Mid-Morning	Fruit bowl or sprouts chaat
Lunch	2 multigrain rotis + sabzi + dal + salad
Evening	Green tea + handful of mixed nuts
Dinner	Vegetable soup + 1 roti + curd

LIFESTYLE RECOMMENDATIONS

■ 30 min moderate exercise — walking, cycling, swimming
■■ Maintain healthy BMI (18.5–24.9)
■ Annual cardiac checkup
■ Meditation — 10 min daily for stress
■ Regular sleep schedule — same time daily
■ Drink 2.5–3 liters of water daily
